Summer Math Challenge

In an effort to keep our students math skills sharp and current, we have set-up a required math challenge for students entering grades K-12. The following websites have activities and lessons to build students math skills. Students are required to document dates and minutes spent on each of these websites. Total minutes should be 400. Students should do practice lessons, games, quizzes and watch animated tutorials from these websites. If you have educational software that builds math skills, you can document the publisher and title of the computer software along with the number of minutes spent at each sitting.

These reports are due to their teacher on the first day of school and will be a part of the first quarter's Math grades. Since the purpose of these assignments are to keep students learning throughout the summer, there will be no make-ups of these assignments once September comes.

Classzone.com

softschools.com

math.com

sheppardsoftware.com

coolmath.com

mathplayground.com (timed flashcard drills)

aplusmath.com

arithmemouse.com (free demo multiplication tables game)

thatquiz.org

coolmath4kids.com

ixl.com

algebra.com (also has SAT test prep questions)

brainskills.com (students who do not already have a username and password should email Mrs. Pastori for one)

funbrain.com

majortests.com/sat

eduplace.com

testcircle.com (subscription site, but they have free demo videos)

bigbrainz.com (Timez Attack game download for practice with multiplication tables)

thegreatmartinicompany.com (good for practicing number facts)
